

DEMAND RESPONSIBLE GROWTH!

Save Single-Family Neighborhoods for Future Generations

Citywide Protest Saturday, May 6th

Normal Heights: Noon to 2:00 at 35th and Adams Ave.

Communities across the city will stage protests throughout the day, starting with University City, Normal Heights, Clairemont, Uptown, and the College Area.

Density Belongs on Transit Corridors!

City Hall is proposing Community Plan Updates with extreme density in single-family neighborhoods rather than along transit corridors. This would benefit developers while depriving residents of what they really need: truly affordable housing, increased transit usage and economic development.

Meanwhile, the city is providing no infrastructure to support extensive growth.

JOIN US to demand that ALL Community Plans support responsible growth: focus density on transit corridors, provide supportive infrastructure to match population growth, and zone for anticipated, not unlimited growth.

Your neighborhood could be next!
